Tutorial Documentation:

Two online tutorials were watched throughout the development of release 1. Additionally, if further help was needed, the ruby on rails guides website (Website 1) was used for documentation on each library. The tutorial (Tutorial 1) by Michael Hart was the foundation for the website used in this project. The second tutorial followed was the Ruby on Rails 5 Essential Training on Lynda.com (Tutorial 2). This tutorial helped cover and fill gaps in understanding left behind from Tutorial 1.
